Launch Day Sequence

- 1 CHECK-IN YOUR ROCKET**
Upon check-in at the REGISTRATION tent, your team will receive nametags, a scorecard, participation certificates, and your rocket motor, wadding, and "egg"stronaut.
- 2 ROCKET INSPECTION**
Immediately following check-in, your rocket must be inspected. If the rocket fails inspection, please visit the TECH SUPPORT tent for assistance. If the rocket passes inspection, your rocket will be entered into the launch queue and you should wait to be called to mission control. You must provide your predicted apogee at this time.
- 3 WAIT TO BE CALLED TO MISSION CONTROL**
When your team is called to MISSION CONTROL tent, your team must bring your rocket (with motor installed and wadding/egg inside) along with your scoresheet and clipboard. Please keep the nametags and participation certificates for team members.

To check your place in the queue and view the launch order, please visit www.launchorder.org

INSIDE THE MISSION CONTROL TENT

- 4 FINAL INSPECTION & JUDGING**
Rockets, now with motors attached and egg/wadding in place, judges will perform a final pre-launch inspection. Judges will also interview team members on their knowledge of rocket science, rocket construction, and their aesthetic/design.
- 5 ALTIMETER INSTALLATION**
- 6 LAUNCH & RECOVERY!**
