

Make a Bird Feeder

Materials

- String
- Scissors
- Cardboard tube- we recommend a paper towel or toilet paper tube
- Peanut butter
- Bird seed
- Dish
- Butter knife
- Stick or wooden skewer (optional)

Instructions 1 Poke a hole in the tube on either side at the top of the roll. Tie a string through the holes. As an option you can add two more holes at the bottom the roll and stick a stick or wooden skewer through the holes.

2 Put bird seed in a dish and cover the tube in peanut butter.

3 Roll the tube right away in the bird seed to cover it with bird seed.

4 Hang the feeder in an area where you can see it and where birds will find the feeder.
