

# **MOST** \* *Scratch & Sniff Painting*

---

## ***Materials***

- Paper
- Gelatin Powder
- Glue
- Cookie Cutters

**1**

Set out the materials and let children explore the gelatin powders. What do the powders feel like? What do they smell like?

**2**

Place the cookie cutters on a piece of paper. Holding the cookie cutter down, glue inside the shape. You can either make an outline of the shape or fill it all the way in.

**3**

Sprinkle the powder over the glue before it dries completely.

**4**

Make the rest of your picture! You can do as many glue shapes as you want, but also feel free to draw and color the rest of the sheet.

**5**

Once the glue is completely dry, you can scratch and sniff your painting! Try it out! What does your picture smell like? How has the texture of the gelatin powder changed?
