Sorting Recycling and Trash

Materials

- Index cards
- Writing utensil
- 2 Containers

Instructions 1 On index cards draw and write the names of materials that you commonly throw away or recycle.

2 Have your child sort the index cards into things that you recycle or throw out. One container is for recyclables and the other is for trash.

Recycling is important because it helps reduce the amount of waste that ends up in the landfill, resulting in less greenhouse gases. It also reduces the need to collect more raw materials which diminishes the pollution that would be created while collecting that raw material. In addition, it helps conserve natural resources and energy use.
