

# Survey of Genetics

---

## Materials:

- Writing utensil
- Paper to record data
- People!

1. Ask friends, family, classmates, or neighbors the color of their cat.
2. Record this data on paper.
3. Consider what colors might be caused by dominant or recessive genes based on the data recorded.
4. If working with a class, have each student complete steps 1-3, and then combine the data for a larger sample size.
