

Dear Friend of the MOST,
**A lot goes into making
a science museum work.**

Every day, visitors walk through
our doors to explore exhibits,
experience science firsthand, and
discover something new.

What they don't see is everything
happening behind the scenes to
make those experiences possible
— and that is where your support
makes an enormous difference.

**Gifts to the MOST
Foundation fund three
essential areas of our work:**

**Keeping our
exhibits working
— and the science
current**

**Making STEM
education
accessible to more
students**

**Caring for the
Armory**

Hands-on exhibits get a lot of love, which also means a lot of wear and tear. Your support helps us repair and maintain exhibits and, just as importantly, update them as science, technology, and our understanding of the world continue to change.

All of our STEM education resources are FREE. Our Workforce Discovery and STEM Challenge programs are hands-on, accessible learning initiatives that spark curiosity, build confidence, and introduce students to the possibilities of STEM careers. Donor support is the reason we can offer free field trips, camp attendance, and other STEM experiences to schools and community organizations working with underserved students. For many of them, these opportunities simply would not be possible without your financial support.

Our historic building is one thing that makes the MOST special — but maintaining a building of this age and size is a significant responsibility for a small museum. From everyday repairs to larger infrastructure needs, caring for our home is essential to keeping the MOST safe, welcoming, and accessible for generations to come.

**At the MOST,*
we do a lot
with a little**

We are careful with our resources, creative in how we use them, and committed to making every dollar count. That means a gift of any size truly matters.

Every dollar helps. Every contribution matters.

Please consider a gift to the MOST Foundation today. Together, we can keep the MOST strong, accessible, and inspiring for the thousands of people who learn, explore, & discover here each year.

Thank you for believing in the MOST and in the work we do.

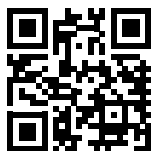

With gratitude,

Lauren Kochian

President, Milton J. Rubenstein Museum of Science & Technology

P.S. Caring for a nearly 120-year-old building also means tackling some very big projects. In the months ahead, we'll be sharing more about plans to address the MOST's roof and other critical needs of our historic Armory — and how our community can help ensure this remarkable building remains home to the MOST for generations to come.
